- SoftSkills: Communication,Teamwork,Timemanagement

Projects

Shopping cart Website | Link   *HTML,CSS,Javascript.*
- Search products by name.
- See the added products in the cart with the product image, name, price, and quantity.
- Update the quantity of items or remove them from the cart.
- The total price updates automatically based on the selected items and their quantities.

QR CodeGenerator | Link   *HTML,CSS,Javascript.*
- It provides a text input field where the user can enter any text or URL.
- On clicking the "Generate QR" button, a QR code is created and displayed below the input.

Web Based Calculator | Link   *HTML,CSS,Javascript.*
- To create a simple and easy-to-use calculator.
- To perform all basic arithmetic operations.
- To design a neat and clear user interface.

Cafe Management | Link   *Python.*
- It is a simple cafe ordering system that lets a user order one or two items from a fixed menu.
- It calculates the total price, shows errors for invalid items, and displays the final order value.

Banking App | Link   *Python.*
- It is a simple banking system in Python where you can deposit, withdraw, check your balance, and view transaction history.
- It also shows the total number of deposits and withdrawals made.

Achievements

- Successfully implemented key e-commerce features in the website, including a product list, a search bar, and a dynamic cart.
- Gained practical experience in Data Analytics through an internship with the YBI Foundation.

Additional training and Certifications

- Completed a Data Analytics Internship with YBI Foundation (one month).
- Workshop on PCB Design by Datapoint.
